

DATASHEET

CONCRETE WAX

PRODUCT DESCRIPTION

Coated fine mineral of great strength for vertical and horizontal surfaces. It can be used indoors and outdoors for all types of dry or wet room (indoor shower, fountain).

COMPOSITION

Rate not measurable VOC less than 0.1 ppm, or less than 0.00001 %.
Coating consisting of: 95 % of mineral filler: Portland cement, lime, silica
5 % of adjuvants and resins

FEATURES

Particle size: from 0 to 0.5 mm
Density: about 2
Adhesion to concrete: 2 to 2.5 MPa
End of: 4 h
Return on surface 1.3 kg / m²
Packaging: 10 kg bucket
Retention: 1 year in original packaging.

TECHNICAL DATA

Operating temperature: 5-30 ° C
Drying time before treatment:
- 20 ° C 24 hours
- 25 ° C 12 hours
- 5 ° C for 48 hours

APPLICATION

Apply two layers of 1.5 mm maximum.
Wait at least 1 hour between coats.
Use a trowel to stuccer or a stainless steel trowel to smooth though the two layers.
Ferrez the second layer to make it perfectly smooth.
